Unlock your potential using

TRI-FLOW™

lubricating security equipment

For some twenty years, the use of Tri-Flow Industrial Lubricant in Yale Security products' internationally renowned Pin Tumbler Cylinder Locks has been proven consistently reliable.

Tri-Flow, the advanced penetrating lubricant, ensures that precision parts resist seizure due to dirt, corrosion or freezing. Tri-Flow displaces moisture and intricate mechanisms stay free of rust and damp, extending their useful life. Tri-Flow contain P.T.F.E.* which enhances the lubrication capabilities and helps to displace dirt mechanically.

Yale Security Products' Manufacturing Director, continues: "A predetermined quantity of Tri-Flow is injected in to each cylinder lock from a remote reservoir, at the final assembly stage.

We find it easy to dispense, it penetrates in to the lock very well and helps to ensure longevity of the lock's life. Quality lubrication is particularly important to a lock's life especially in situation of repeated use, such as points of entry."
